The vehicle does not work properly; the range is too small!

- Is battery/accumulator power fading?
- Are any other remote control devices close by which might be transmitting on the same frequency?
- Is interference being caused by metal railings or fences?
- Transmitter or power masts often cause the model vehicle to behave in an uncontrolled manner.
- Are there walkie-talkies/CB radios/wireless networks in the vicinity that might cause interference?
- The vehicle is very warm. Switch both car and controller off and allow the car to cool down for about 30 minutes.
