ANAKIN'S JEDI STARFIGHTER

During the Battle of Coruscant, Anakin Skywalker and his teacher Obi-Wan Kenobi were sent to rescue Chancellor Palpatine from the hands of the Separatists. Anakin Skywalker sets out accompanied by his resourceful droid R2-D2 with the small Eta-2 Jedi Starfighter. The Eta-2 Jedi Starfighter is the most advanced fighter craft ever made. Anakin's state-of-the-art fighter has yellow markings, reminiscent of his Podracer that freed him from slavery on Tatooine. Yellow markings were also carried by the Airspeeder with which he hunted the bounty hunter Zam Wesell through the streets of Coruscant. Anakin is reputed to be the "best pilot in the galaxy" and his manoeuvres take the Starfighter right to the limits of its capabilities. These dare-devil manoeuvres are extremely successful, but not always...
