The Beetle was mass produced by Volkswagen from 1945 to 2003 and by June 2002, with sales of over 21.5 million, it was the most widely sold car in the world. For many years the Volkswagen Beetle was the car in which everything began. Innumerable young people learned to drive in it, innumerable people drove it as the first and, if possible, often the last car in their lives. The Beetle was and remains to this day a cult car. Such a car carries so many dreams, so many memories that it is of interest to motor lovers of all ages. During its long period in production, the Beetle went through many stages of evolution, without alteration to its typical features. Originally designed at the end of the 1930's as an affordable car for all, after World War II the Beetle was able to meet this requirement with ease. Over the years innumerable families have wished for functioning heating or luggage space for a family of four. In the Beetle the little compartment behind the seats and the tight space under the bonnet, that has to be shared with the spare wheel and the water reservoir, were the only storage space. But that never prevented the success of this insect. In 1968 the Beetle reached a standard that always kept it ahead of the competition. The former 25 hp 1131 cc engine became a 44 hp 1500 cc engine. Front disc brakes and a new semi-trailing-arm rear axle kept its temperament in check. The body work underwent some changes. The headlamps were now vertical and it was possible to fill up the tank from a side flap without having to open the bonnet; screw points for safety belts were even introduced. At the end of 1968 the box-type Europa bumpers, affectionately known as "railway lines", replaced the round ones. In short, the Beetle had come right up to date; and the Beetle reaped its reward. In 1968 alone a total of 1,186,134 Beetles crawled off the production lines.
Read before you start!

1. Please take a look at the complete instructions before you start. Make sure that you understand all the steps before you start.

2. Please make sure that you have everything you need before you start. Make sure that you have all the materials and equipment necessary for the task.

3. Please be careful and follow the instructions carefully. Make sure that you are following the instructions exactly as they are written.

4. Please make sure that you are working in a safe environment. Make sure that you are following all safety precautions.

5. Please make sure that you are completing the task to the best of your ability. Make sure that you are doing the best job that you can.
