"The Galleon appeared out of the mist on the early morning horizon, off the port quarter, bearing down on us from out of the blood-red sunrise. At first we took her for a merchant ship, like us, traveling home from the Jamaica coast or the Bahamas heavily laden with cargo. But she was moving too fast. As she approached, she dropped her main sail and revealed her dreaded skull and crossbones. Pirates! We now knew of her sinister intentions. We went hard to starboard to try and catch a beam reach, praying she would not overtake us..."

Like an exiting high-seas novel comes the Caribbean Pirate ship kit from Revell. Features include 6 on deck cannon and molded ratlines. Authentic galleon details and colorful pirate decals will make this a ship that will stand out anywhere.
