There is a certain breed of car that right from the start is made to do one thing...go fast. With an all-new sleek fastback body design introduced in 1970, the Torino Cobra Jet is one of those cars that looks like it's "moving out" when it's just standing still. The race bred High Performance 429 c.i.d. 360 h.p.+. Cobra Jet engine featured a functional "shaker" hood scoop. A beautiful combination of looks and power with fastback styling, black-out hood and grille and Magnum 500 wheels. It was the sensation of 1970. The Torino Cobra dominated NASA, drag and street racing and is still one of the most popular and collectible muscle cars on the road today!
