Ever since its inception in 1964, the Mustang has been America's "fun" car. The kind of car an owner can look at and say "Ok, what can I do with this baby?". As a result, the Mustang has become a very personal car and it doesn't hurt that it's also very adaptable to current trends.

Of course, the most current trend is the lowrider craze and now, the custom crowd has discovered that the Mustang looks right at home with a set of lowrider wheels and some wild, colorful body graphics.

The Mustang has been redesigned several times since the little pony trotted on the 1960's scene, but no matter what body style, it always looks as good as a convertible. Build your lowrider with the top up or down, paint it any color you want, but by means, have fun with it!

Your Revell kit includes quality injected-plastic parts with custom wheels, detailed engine decals to make your kit stand out in the crowd!
