Shelby American was the brainchild of Texan Carroll Shelby, entrepreneur, team manager and racing driver. He won the 1959 24 hours of Le Mans, among other races. His partnership with Ford Motor Company in the early 1960s produced the classic Shelby Cobra. Following an introduction of the Ford Mustang, the Shelby GT-350 was born. After five years of production, the last version of the Shelby Mustang was introduced in 1969.

For 1969 and 70, Shelbys were almost completely distinct from the regular Mustang, thanks to a unique fiberglass front end clip, hood and fenders. Functional fiberglass scoops ducted air to both the front and rear brakes. Twin NACA scoops in the hood were for carburetor fresh air, while the two scoops at the rear of the hood exhausted hot air from the engine bay. NASCAR-style hood tie downs were fitted for the nose, while Thunderbird taillights, with sequential turn signals, set off the tail. All of the hardtops were based upon Ford's new Mustang "Sportsroof" fastback coupe, and wore a set of plated, five-spoke Magnum 500 wheels standard.

Your Revell Monogram replicates this famous Shelby in its final form. The model has an opening hood and provides full chassis and engine detail. All of the original Shelby features are included, along with aftermarket accessories for a second street machine version. Four polished aluminum Centerline wheels take care of the exterior, while a tunnel ram intake manifold with twin four barrel carburetors and velocity stacks complete a pro stock style engine variation. "2 'n 1" means two ways to build it!

**READ THIS BEFORE YOU BEGIN**

- Each plastic part is identified by a number.
- In the assembly drawings, some parts will be marked by a star (*) to indicate chrome plated plastic.
- For better paint and decal adhesion, wash the plastic parts in a mild detergent solution. Rinse and let air dry.
- Check the fit of each piece before cementing in place.
- Use only cement for polystyrene plastic.
- Sorcopol plating and painting from areas to be cemented.
- Allow paint to dry thoroughly before handling parts.
- Any unused parts may be discarded.

**DECAL APPLICATION INSTRUCTIONS**

1. Cut desired decal from sheet.
2. Dip decal in water for a few seconds.
3. Place wet decal on paper towel.
4. Wait until decal is movable on paper backing.
5. Place decal in position on model, face up and slide backing away.
6. Press out air bubbles with a soft damp cloth.
7. Milking that may appear is for better decal adhesion and will dry clear. Wipe away any excess adhesive.
8. Do not touch decal until fully dry.
9. Allow the decals 48 hours to dry before applying clear coat.

NOTE: Decals are not compatible with setting solutions or solvents.

**DIRECTIVES D'APPLICATION DES AUTOCOLLANTS**

1. Découper l'autocollant désiré de la feuille.
2. Tremper l'autocollant dans de l'eau pendant quelques secondes.
3. Placer l'autocollant mouillé sur une serviette en papier.
4. Attendre que l'autocollant puisse être déplacé sur son support en papier.
5. Voir l'autocollant en position sur le modèle face sur le dessus et faire glisser le support pour l'enlever.
6. Appuyer avec un chiffon doux humide pour éliminer les bulles d'air.
7. La substance laitée qui peut apparaître est destinée à améliorer l'adhésion de l'autocollant et devient inodore au séchage. Essuyer pour enlever tout exsudat d'adhésif.
8. Ne pas toucher l'autocollant tant qu'il n'est pas bien sec.
9. Laisser l'autocollant sécher pendant 48 heures avant d'appliquer une couche transparente.

**REMBOURED** Les autocollants sont incompatibles avec les solutions de fixage ou les solvants.

We recommend ProModeler™ or Revell-Monogram paints.
