The Impala was Chevrolet's flagship full-size car for 1964, and it fulfilled the role well. The Impala line was an outstanding seller for Chevrolet in the early sixties - in 1964, Chevrolet made about 889,600 Impalas, 185,325 of which were SS models. The Impala's image had matured gracefully since the nameplate's introduction in 1958, and the crisp, formal styling of the '64 Impalas fit this image well. The popular Super Sport option, which included unique body trim and wheel covers, added $161 to the $2786 base price of a V-8 powered Impala Sport Coupe. The SS package could be had on either the hardtop or convertible, with 6 cylinder or V-8 power.

The 1964 Impala was a definite success with the general car-buying public when it was first introduced, but over the years it has gained cult status as the car of choice among lowrider enthusiasts. '64 Impalas are arguably the most popular "starting points" for lowrider builders, much like '32 Fords are to hot rodders and '49-51 Merceries are to customizers. Your Revell 2 ‘n 1 kit is an accurate replica of this classic Chevy. All parts to build an accurate stock version are included, along with lowrider parts like trunk mounted batteries and pumps, wheels, chain link steering wheel, and hydraulic switch box are included - suspension may be built in several different settings, enabling you to lowrider stance. Whether you choose to build your model factory stock sure to have a winner!

### DECAL APPLICATION INSTRUCTIONS

*This paint guide is provided to complete this kit as shown on the box.*
