The 1970 Dodge Challenger T/A ranks as one of the wildest and most desirable musclecars ever built. The T/A was a special limited production model built so the Challenger could compete in the legendary SCCA Trans Am series, and Dodge added plenty of unique features. All T/A's were equipped with a matte black fiberglass hood with functional scoop, duck tail rear spoiler, an aggressive striping package, and wild low restriction, side-exit exhaust with megaphone tips. The 340 cu in, small block V8 was equipped with three 2-barrel carbs, and was factory rated at 290 horsepower. Your Revell kit enables you to build an accurate replica of a stock Challenger T/A and includes custom parts as well. An optional custom hood and high rear dual four barrel intake, rear spoiler, and Centerline wheels are included as well as factory and custom decals so you can create your own custom Dodge Challenger street machine.

**DECAL APPLICATION INSTRUCTIONS**

**READ THIS BEFORE YOU BEGIN**

- Study the assembly drawings.
- Each plastic part is identified by a number. In the assembly drawings, some parts will be marked by a star (*) to indicate chrome plated plastic.
- For better paint and decal adhesion, wash the plastic parts in a mild detergent solution. Rinse and let air dry.
- Check the fit of each piece before cementing in place.
- Use only cement for polystyrene plastic.
- Scrape plating and paint from areas to be cemented.
- Allow parts to dry thoroughly before handling parts.
- Any unused parts may be discarded.

**DECAL PLACEMENT GUIDE**

1. Cut desired decal from sheet.
2. Dip decal in water for a few seconds.
3. Place wet decal on paper towel.
4. Wait until decal is movable on paper backing.
5. Place decal in position on model, face up and slide backing away.
6. Press out air bubbles with a soft damp cloth.
7. Milkiness that may appear is for better decal adhesion and will dry clear. Wipe away any excess adhesive.
8. Allow decals 48 hours to dry before applying clear coat.
9. Allow the decals 48 hours to dry before applying clear coat.

**NOTE:** Decals are compatible with setting solutions or solvents.

**Decal Application Instructions**

1. Cut desired decal from sheet.
2. Dip decal in water for a few seconds.
3. Place decal on paper towel.
4. Wait until decal is movable on paper backing.
5. Place decal in position on model, face up and slide backing away.
6. Press out air bubbles with a soft damp cloth.
7. Milkiness that may appear is for better decal adhesion and will dry clear. Wipe away any excess adhesive.
8. Allow decal to dry for 24 hours or until fully dry.
9. Allow the decals 48 hours to dry before applying clear coat.

**NOTICE:** Decals are compatible with setting solutions or solvents.

**Directives d’application des autocollants**

1. Découpez l’autocollant désiré de la feuille.
2. Trempez l’autocollant dans de l’eau pendant quelques secondes.
3. Placez l’autocollant mouillé sur une serviette en papier.
4. Attendez que l’autocollant puisse être déplacé sur son support en papier.
5. Mettre l’autocollant en position sur le modèle face sur le dessus et faire glisser le support pour l’enlever.
6. Appuyer avec un chiffon doux humide pour éliminer les bulles d’air.
7. Laisser l’autocollant sècher pendant 48 heures avant d’appliquer une couche transparente.

**REMARQUE:** Les autocollants sont compatibles avec les solutions de fixation ou les solvants.
