One of the more notable names in Corvette® performance and racing history is John Greenwood. Like many American car enthusiasts in the late 1960’s, John was a drag racing fan. However, once learning about and then trying out gymkhana type competition among non-professional drivers, John fell for road racing. At the time, he was driving a ’68 Corvette® equipped with the special L-88 version of Chevy’s® big block 427 engine, so he had some pretty heavy-duty hardware to start with.

Greenwood went off to school, road racing school that is, and gained his Sports Car Club of America (SCCA) competition license. Spending most of 1969 competing in regional SCCA events, John was a quick study. By 1970, he was competing and became national champion in A/Production class, driving a 427 Corvette®. The choice of mount was completely predictable as not too many people knew how to squeeze out more horsepower from a big block Chevy® V8 than John Greenwood.

For the 12 hours of Sebring race in 1971, John built a colorful red, white and blue C2 Corvette®. A roadster with the optional removable roof fastened on, the #48 was again powered by the mighty 427 V8. Along with co-driver Dick Smothers, the dark haired “straight man” to brother Tommy as half of the Smothers Brothers comedy duo of the 1960’s, John came in first in GT class, coming in 7th overall.

It is this car as it competed at Sebring in 1971 that we present for you in this Revell-Monogram kit. It features many vintage racing parts as well as beautiful silkscreen decals produced by Cartograf of Italy to depict the “Stars and Stripes” paint scheme.

---

**DECAL APPLICATION INSTRUCTIONS**

1. Cut desired decal from sheet.
2. Dip decal in water for a few seconds.
3. Place wet decal on paper towel.
4. Wait until decal is movable on paper backing.
5. Place decal in position on model, face up and slide backing away.
6. Press out air bubbles with a soft damp cloth.
7. Milkiness that may appear is for better decal adhesion and will dry clear. Wipe away any excess adhesive.
8. Do not touch decal until fully dry.
9. Allow the decals 48 hours to dry before applying clear coat.

**DIRECTIVES D’APPLICATION DES AUTOCOLLANTS**

1. Découper l’autocollant désiré de la feuille.
2. Tremer l’autocollant dans de l’eau pendant quelques secondes.
4. Attendez que l’autocollant puisse être déplacé sur son support en papier.
5. Mettre l’autocollant en position sur le modèle face sur le dessus et faire glisser le support pour l’enlever.
6. Appuyer avec un chiffon doux humide pour éliminer les bulles d’air.
7. La substance laiteuse qui peut apparaître est destinée à améliorer l’adhésion de l’autocollant et devient incolore au séchage. Essuyer pour enlever tout excédent d’adhésif.
8. Ne pas toucher l’autocollant tant qu’il n’est pas bien sec.

**This paint guide is provided to complete this kit as shown on the box.**
