Probably no other car has impacted middle class America quite the way the 1955-57 Chevrolet did. For the first time, GM made OHV V8 engine horsepower available in a popularly priced car, and in many different body styles as well. Previously, such an engine was installed mostly in premium priced sedans. Two-door hardtop and convertible body styles were relatively scarce, and even more expensive. The new V8 Chevrolet changed all that.

One of the most unique designs was the Chevrolet Nomad station wagon. While two-door station wagons were rather common, what made this version a real standout was that it was a two-door hardtop station wagon. Next to a standard wagon, the Nomad was positively rakish, so much so, that stylists had actually inclined the tailgate to match the swept back roof pillars. Beside good looks, an increased backlight area and wraparound rear windows gave the Nomad outstanding outward visibility. Passengers felt as though they were riding in a vista-dome railway coach!

The famous "Tri-Chevy Nomad wagons" were built on their particular chassis for only three years; 1955 to 1957. So also was the two-door hardtop Nomad wagon. Your Revell/Monogram kit is the 1956 version, never before available in a 1/25th scale plastic assembly kit. The landmark chassis is represented in full detail, as well as the revolutionary 265 CID "Smallblock" Chevrolet V8 engine. DeLuxe trim and bumper guards are included, along with full chrome wheel covers and wide whitewall tires. Based on a GM Motorama concept, customers said that owning a Nomad was like driving a show car, a fact you'll be able to appreciate when you build this authentic model kit.

### READ THIS BEFORE YOU BEGIN

- Study the assembly drawings.
- Each plastic part is identified by a number.
- In the assembly drawings, some parts will be marked by a star (*) to indicate chrome plated plastic.
- For better paint and decal adhesion, wash the plastic parts in a mild detergent solution. Rinse and let air dry.
- Check the fit of each piece before cementing in place.
- Use only cement for polystyrene plastic.
- Scrape plating and paint from areas to be cemented.
- Allow paint to dry thoroughly before handling parts.
- Any unused parts may be discarded.

### DECAL APPLICATION INSTRUCTIONS

1. Cut desired decal from sheet.
2. Dip decal in water for a few seconds.
3. Place wet decal on paper towel.
4. Wait until decal is movable on paper backing.
5. Place decal in position on model, face up and slide backing away.
6. Press out air bubbles with a soft damp cloth.
7. Mildness that may appear is for better decal adhesion and will dry clear. Wipe away any excess adhesive.
8. Do not touch decal until fully dry.
9. Allow the decals 48 hours to dry before applying clear coat.

**NOTE:** Decals are compatible with setting solutions or solvents.

### LIRE CE QUI SUIT AVANT DE COMMENCER

- Étudiez les schémas de montage.
- Chaque pièce en plastique est identifiée par un numéro.
- Sur les schémas de montage, certaines pièces sont marquées d'une étoile (*) pour indiquer qu'elles sont en plastique chromé.
- Pour une meilleure prise de la peinture et des autocollants, laver les pièces en plastique avec une solution détergente peu concentrée. Les essuyer et les laisser sécher à l'air.
- Vérifier que chaque pièce s'adapte bien avant de la coller en place.
- N'utiliser que de la colle pour polystyrène.
- Grattez les parties à coller enlevant le chrome et la peinture.
- Laisser la peinture bien sécher avant de manipuler les pièces.
- Toute pièce insuffisante peut être jetée.

### DIRECTIVES D'APPLICATION DES AUTOCOLLANTS

1. Découper l'autocollant désiré de la feuille.
2. Tremper l'autocollant dans de l'eau pendant quelques secondes.
3. Placer l'autocollant mouillé sur une serviette en papier.
4. Attendez que l'autocollant puisse être déplacé sur son support en papier.
5. Mettre l'autocollant en position sur le modèle face sur le dessus et faire glisser le support pour l'enlever.
6. Appuyer avec un chiffon humide pour éliminer les bulles d'air.
7. La substance blanche qui peut apparaître est destinée à améliorer l'adhésion de l'autocollant et doit être enlevée.
8. Ne pas toucher l'autocollant tant qu'il n'est pas bien sec.
9. Laisser l'autocollant sécher pendant 48 heures avant d'appliquer une couche transparente.

**REMARQUE:** Les autocollants sont compatibles avec les solutions de fixation ou solvants.

### This paint guide is provided to complete this kit as shown on the box.

- **Semigloss Black** Noir Saliné
- **Flat Black** Noir Mat
- **Flat White** Blanc Mat
- **Aluminum** Aluminium
- **Gloss Light Green** Vert Clair Brillant
- **Silver** Argent
- **Steel** Acier
- **Turn Signal Amber** Ambre
- **Teal Metallic** Bleu-vert Métallisé
- **Transparent Blue** Bleu Transparent
