**Zündapp KS 750**

Über 18.000 Exemplare des Modells Zündapp KS 750 wurden von 1941 bis 1944 in Serie hergestellt. Dank seiner klaren Linienführung und des zweckmäßigen technischen Konzepts war es eines der fortschrittlichsten und modernsten Motorräder seiner Zeit. Aufgrund seiner außerordentlichen Leistungen und Robustheit wurde es vom Deutschen Heer während des zweiten Weltkrieges an allen Fronten eingesetzt. Der Viertaktmotor mit einem Hubraum von 751 ccm erzielte eine konstante Leistung von 26 PS bei 4.400 Umdrehungen pro Minute. Die Motorkraft wurde auf zwei Antriebsräder verteilt, die das 400 kg (mit Beiwagen) schwere Krad auf eine maximale Geschwindigkeit von 95 Km/h beschleunigten. Die Zündapp verfügte über 4 Vorwärtsgänge, einen untersetzten Geländegang und sogar über einen Rückwärtsgang. Der Verbrauch betrug auf der Straße ca. 7 Liter pro 100 Km, im Gelände wurden es 9 Liter und mehr, trotzdem konnte eine Reichweite von 350 Km erzielt werden.

Zündapp KS 750

More than 18,000 machines of the Zündapp KS 750 model were produced in series between 1941 and 1944. With its clear, streamlined design and practical technological concept, it was one of the most advanced and state-of-the-art motorcycles of its day. Thanks to its exceptional performance and robustness it was deployed by the German Army on all fronts during WW II. The 751 cc four-stroke engine produced a constant output of 26 h.p. at 4,400 rpm. The engine power was transferred to two drive wheels which accelerated this heavy motorcycle (400 kg incl. sidecar) to a top speed of 95 km/h. The Zündapp had four forward speeds, a stepped-down off-road gear and even a reverse gear. Fuel consumption on the road was approx. 7 litres per 100 kilometres, off-road it took 9 litres and more. Nevertheless, a range of around 350 kilometres could be achieved.
