Ford Focus SVT Tuner Series 2'n 1

Truly a world car for the masses, the Ford Focus is produced in many different versions in many different countries. Here in the USA, with the top selling American vehicles list in the last few years dominated by trucks and sport utility vehicles, the Focus is a runaway sales success. Its combination of good fuel mileage and sizable cargo space makes it a very practical car. Practical cars, however, aren't always the most fun type of car to drive

if you tend to lean that way. That's where Ford engineers went to work and built in tight, neutral handling characteristics. The higher performing 170 horsepower version of the Focus four cylinder engine found in the SVT model transforms this practical car into a serious pocket rocket. It's no wonder that so many into the tuner car scene have picked up on the Focus SVT.
